HCEO is run by the Center for the Economics of Human Development, and funded by the Institute for New Economic Thinking.
The Human Capital and Economic Opportunity Global Working Group has continued to flourish in 2018 and expand into new areas of collaboration around the world. This year we deepened our commitment to training the next generation of scholars by hosting new training seminars focused on academics in all stages of their careers, including masters students, early stage Ph.D. students, and early career faculty. Through partnerships with Jinan University in Guangzhou and Peking University in Beijing, HCEO hosted a Student Training Seminar and a Faculty Training Seminar, each geared towards providing specialized training that will lead to more rigorous scholarship around issues of inequality. These programs aligned within our existing Summer Schools Series, and complemented our traditional summer schools hosted in Bonn and Chicago.

In addition to our training programs, HCEO is dedicated to disseminating members’ academic findings to broader audiences. For example, this year HCEO produced 12 new Research Spotlights which take top working papers and distill them into news quality articles. We are pleased to report the year’s most engaging research spotlight featured “Publishing and Promotion in Economics,” an original project by the Center for the Economics of Human Development whose research was funded by INET.

Looking ahead, HCEO is dedicated to fostering the spirit of new economic thinking through our ongoing work, and we look forward to continued growth in the years to come.

James J. Heckman       Steven N. Durlauf       Robert H. Dugger
HCEO achieves its mission through workshops, conferences, webinars, cross-institutional visits, partnerships, and annual summer schools. Since its inception in January 2011, HCEO has held 98 events in 12 countries. HCEO events have attracted over 3,135 participants. Here we list our upcoming events and highlight three recent events. More details, including videos and related materials, can be found on our website at hceconomics.org.

**UPCOMING EVENTS**

- February 4–6, 2019  ·  Breastfeeding and the Origins of Health: Interdisciplinary Perspectives and Priorities, Winnipeg, Canada
- June 24–28, 2019  ·  Summer School on Socioeconomic Inequality 2019, Bergen, Norway

**FEATURED RECENT EVENTS**

- November 9–10, 2018  ·  Social Interactions and Education, Chicago IL
  This workshop brought together social scientists to consider different aspects of education, with a focus on melding individual and social explanations of individual and group outcomes. Social influences on education include mechanisms ranging from role model effects to peer pressure. The workshop brought together different methodological perspectives.
  Both market designers and development economists are deeply engaged in translating economic insights from theory into practice. Nevertheless, their toolkits are quite different – and so far there’s been little direct collaboration and exchange between them. This conference matched market design experts with economists working on problems of incentive design, resource allocation, entrepreneurship, and health in developing countries. Each session presented an existing research project, followed by a (discussant-guided) conversation providing perspective and context from the market design literature. The participants will generalize and expand from each project into a broader research agenda.
- June 26–29, 2018  ·  Faculty Collaborative Seminar, Guangzhou, China
  HCEO and the Institute for Economic and Social Research (IESR) at Jinan University hosted a week-long Faculty Training Seminar in Guangzhou. The seminar was designed to foster international collaboration between early stage faculty and post-doctoral scholars working in economics. The program included rigorous lectures from leading faculty on topics including intergenerational mobility, program evaluation, skill formation, economic theory, and structural modeling. Participants were given the opportunity to present their own work and participate in working groups organized around shared research interests.

that taught the tools needed to study inequality and communicated a sense of the research frontier in understanding inequality. The school brought together scholars who specialize in China, as well as general methodologists, in order to promote interactions and potential collaborations.

“SSSI prepared me to dive into my research field and use the methods learned in summer school to do better research.”
– Dongsheng Deng, Fudan University

**SUMMER SCHOOL ON SOCIOECONOMIC INEQUALITY 2013–2016 AND 2017 CHINA**

HCEO and the China Center for Economic Research of Peking University offered the first Beijing Summer School on Socioeconomic Inequality in 2013 under the direction of Professors Steven N. Durlauf and Yaohui Zhao. HCEO offered a second and third Beijing Summer School on Socioeconomic Inequality in 2014 and 2015 at the University of Chicago Center in Beijing under the direction of Steven Durlauf, Chao Fu, and Lawrence Blume. Together with IESR, HCEO offered summer schools in 2016 and 2017 at Jinan University in Guangzhou, under the direction of Lawrence Blume, Steven Durlauf, Shuizhang Feng, and Chao Fu. These summer schools provided state-of-the-art overviews of different aspects of the study of inequality with a specific focus on China. It provided an intensive one-week experience.

What I really liked is that we had lectures from researchers that are at the frontier of this discipline [and] that inequality was addressed from all the different points of view: early childhood, cognitive abilities, non-cognitive skills, personality, culture, and social interactions.
– Lina Cardona, Banco de la Republica

**SUMMER SCHOOL ON SOCIOECONOMIC INEQUALITY 2014, 2016, 2017 AND 2018 EUROPE**

The 2017 Moscow Summer School on Socioeconomics inequality, co-organized with the New Economics School in Moscow Russia under the direction of Steven Durlauf and Shlomo Weber welcomed 36 participants from 17 different countries. The intensive 5-day summer school revolved around a series of six lecture blocks led by leading global authorities in economics. These lectures provided participants with a clear sense of the research frontier and introduced them to the tools and methods needed to study questions of crucial interest in this field. Particular attention was given in to the bridging of gaps between theoretical, empirical, and experimental work. The summer school also provided participants with many opportunities to discuss their own research and engage directly with speakers and fellow participants. Previously, HCEO co-organized a Summer School on Social Economics in Cambridge in 2015 and summer schools in Bonn in 2016 and 2018.

“[SSSI prepared me to] dive into my research field and use the methods learned in summer school to do better research.”
– Dongsheng Deng, Fudan University

EMERGING SCHOLARS
Summer Schools, Training Workshops, and Dissertation Prize

HCEO is committed to honoring INET’s mission to build a home for a new generation of thinkers. All HCEO programming engages interdisciplinary groups of graduate students and our Emerging Scholars program provides opportunities for younger researchers to present their work to our senior members.

HCEO held its first annual Summer School on Socioeconomic Inequality at the University of Chicago in 2012 under the direction of James J. Heckman and Steven N. Durlauf and its second from 2013 under the direction of Steven N. Durlauf, James J. Heckman, and Scott Duke Kominers.

HCEO held its third and fourth Summer Schools on Socioeconomic Inequality in Chicago in 2015, 2016, and 2017 under the direction of Steven N. Durlauf, Scott Duke Kominers, and Christopher Taber. Each summer school brought together over thirty-five doctoral students from across the globe and provided state-of-the-art overviews of different aspects of the study of inequality. HCEO hosted its first summer school aimed at master’s students in Chicago in Summer 2018.

“SSSI provided a great introduction to new rigorous empirical approaches to investigate economics through original research [...] In addition to the research methodology, many of the presentations discussed cutting edge research on topics of inequality which I plan to incorporate into my own research.”
– Moiz Bhai, University of Illinois, Chicago
HCEO DISSERTATION PRIZE

In 2017 we launched a competition for the best doctoral dissertation on a topic related to one of HCEO’s six networks. The inaugural prize was awarded to Eric Chyn for his paper, "Moved to Opportunity: The Long-Run Effect of Public Housing Demolition on Labor Market Outcomes of Children." Chyn received a $1,000 prize and presented his research to the Center for the Economics of Human Development, HCEO directors, and University of Chicago faculty. Our 2018 awardees are Tímea Laura Molnár, for the ECI submission "Essays in Applied Microeconomics," and David Lydon-Staley, for the HI submission "Between-Personal Differences in Sensation-Seeking: Implications for Brain-Based Models of Adolescent Risk Taking." Lydon-Staley and Molnár both received a monetary award, and presented their work at University of Chicago in the fall of 2018.

STUDENT TRAINING SEMINARS AND FACULTY COLLABORATIVE SEMINARS 2018

In collaboration with the Peking University Department of Economics, HCEO co-hosted a hands-on student training seminar. At the seminar, students learned the tools needed to take a research idea from its initial stages through the development of an original research question to quantitative analysis of that question using data. At Jinan University, we co-hosted a faculty collaborative seminar for researchers from around the world, with the intention of fostering international collaboration. Participants learned from senior level faculty, presented on their own research projects, and iterated with fellow participants on various projects they are interested in undertaking.
2018-050: The Value of Health Insurance: A Household Job Search Approach
Gabriella Conti, Rita Ginja, and Renata Narita

Do households value access to free health insurance when making labor supply decisions? We answer this question using the introduction of universal health insurance in Mexico, the Seguro Popular (SP), in 2002. The SP targeted individuals not covered by Social Security and broke the link between access to health care and job contract. We start by using the rollout of SP across municipalities in a differences-in-differences approach, and find an increase in informality of 4% among low-educated families with children. We then develop and estimate a household search model that incorporates the pre-reform valuation of formal sector amenities relative to the alternatives (informal sector and non-employment) and the value of SP. The estimated value of the health insurance coverage provided by SP is below the government’s cost of the program, and the corresponding utility gain is, at most, 0.56 per each peso spent.

2018-071: Inequality in Socioemotional Skills: A Cross-Cohort Comparison
Orazio Attanasio, Richard Blundell, Gabriella Conti, and Giacomo Mason

We examine changes in inequality in socioemotional skills very early in life in two British cohorts born 30 years apart. We construct socioemotional scales comparable across cohorts for both boys and girls, using two validated instruments for the measurement of child behaviour. We identify two dimensions of socioemotional skills for each cohort related to the ability of children to focus their concentration and to engage in interpersonal activities. We establish comparability in the inequality of these early skills across cohorts, but not in their average level. We document for the first time that inequality in these early skills has increased across cohorts, especially for boys and at the bottom of the distribution. Our results show the importance of formally testing comparability of measurements to study skills differences across groups, and in general point to the role of inequalities in the early years for the accumulation of health and human capital across the life course.

2018-056: Willingness to Take Risk: The Role of Risk Conception and Optimism
Thomas Dohmen, Simone Quercia, and Jana Willrodt

We show that the disposition to focus on favorable or unfavorable outcomes of risky situations affects willingness to take risk as measured by the general risk question. We demonstrate that this disposition, which we call risk conception, is strongly associated with optimism, a stable facet of personality and that it predicts real-life risk taking. The general risk question captures this disposition alongside pure risk preference. This enlightens why the general risk question is a better predictor of behavior under risk across different domains than measures of pure risk preference. Our results also rationalize why risk taking is related to optimism.

2018-087: Genome-Wide Association Analyses of Risk Tolerance and Risky Behaviors in over One Million Individuals Identify Hundreds of Loci and Shared Genetic Influences

Humans vary substantially in their willingness to take risks. In a combined sample of over one million individuals, we conducted genome-wide association studies (GWAS) of general risk tolerance, adventurousness, and risky behaviors in the driving, drinking, smoking, and sexual domains. We identified 611 approximately independent genetic loci associated with at least one of our phenotypes, including 124 with general risk tolerance. We report evidence of substantial shared genetic influences across general risk tolerance and risky behaviors: 72 of the 124 general risk tolerance loci contain a lead SNP for at least one of our other GWAS, and general risk tolerance is moderately to strongly genetically correlated with a range of risky behaviors. Bioinformatics analyses imply that genes near general–risk–tolerance–associated SNPs are highly expressed in brain tissues and point to a role for glutamatergic and GABAergic neurotransmission. We find no evidence of enrichment for genes previously hypothesized to relate to risk tolerance.

2018-049: Narratives, Imperatives and Moral Reasoning
Roland Bènabou, Armin Falk, and Jean Tirole

By downplaying externalities, magnifying the cost of moral behavior, or suggesting not being pivotal, exculpatory narratives can allow individuals to maintain a positive image when in fact acting in a morally questionable way. Conversely, responsibilizing narratives can help sustain better social norms. We investigate when narratives emerge from a principal or the actor himself, how they are interpreted and transmitted by others, and when they spread virally. We then turn to how narratives compete with imperatives (general moral rules or precepts) as alternative modes of communication to persuade agents to behave in desirable ways.
NEW RESOURCES
Expanding HCEO’s Reach

HCEO has launched several exciting initiatives, aimed at sharing the important research of our 528 members with a wider audience. Our 3 Questions series, Research Spotlight, and member video interviews all work towards HCEO’s mission of understanding and addressing opportunity inequality around the world.

RESEARCH SPOTLIGHTS

Each month on our website, we publish a new Research Spotlight, which is a longform article that highlights the work from a recent HCEO working paper. Our Research Spotlights help make the work of our members accessible to a wider audience. This past year, we have featured papers on topics including: publishing and promotion in economics, optimism trends in the US, and the impact of union membership. In 2018, our Research Spotlights have been accessed through our website over 2,900 times.

Read Recent Spotlights:

Stephanie Carlson: bit.ly/2DE0tux

VIDEO INTERVIEWS

Launched in 2016, our bimonthly HCEO member video interview series continues to be a popular resource. The member interviews are published on the HCEO website as well as on our YouTube channel, where they have garnered more than 10,000 views this year, more than doubled 2017’s numbers. In recent months, we have featured interviews on a wide variety of topics related to inequality, including ECI network member Francesco Agostinelli discussing his work on skill formation, MIP network member Rasmus Landersø on social mobility in Denmark, and ECI/FI network leader Flavio Cunha on his partnership with Texas state and local government agencies designing and evaluating social programs. In 2018, we also launched a new video series where affiliated members discuss how they became interested in their field of study.

3 QUESTIONS

Our 3 Questions series consists of brief interviews with HCEO members across all six networks. Published bimonthly on our website, the interviews spotlight our members and the important research they are doing across disciplines.

HCEO MEMBERS IN THE NEWS

Deepening Understanding of Inequality Scholarship

It is the mission of HCEO to foster a wider understanding of global inequality and promote the use of members’ work to inform policy and interventions that can address poverty and human capital development. Engagement with media is a catalyst for this mission.

The Instant Gratification Generation has more Patience than Kids from the ’60s
Stephanie Carlson
Quartz, June 27, 2018

IP network member Stephanie Carlson spoke to Quartz about her recent HCEO working paper, which shows that kids today were able to delay gratification longer than their peers in the 1960s. Carlson and colleagues compared data from children who took the "Marshmallow Test" in the 1960s, 1980s, and 2000s.

The most sexist places in America
Kerwin Kofi Charles
Washington Post, August 21, 2018

The Washington Post featured new research from MIP network member Kerwin Kofi Charles and co-authors on how sexist beliefs in a woman’s place of birth affect her later-life outcomes. The authors find that "sexism in a woman’s state of birth and in her current state of residence both lower her wages and likelihood of labor force participation, and lead her to marry and bear her first child sooner."

Americans Want to Believe Jobs Are the Solution to Poverty. They’re Not.
Matthew Desmond
The New York Times Magazine, September 11, 2018

In an in-depth article for the New York Times Magazine, MIP network member Matthew Desmond discusses the "productivity-pay gap," the trend in recent decades where corporate profits rise but real wages for workers remain flat.

The U.S. Is Getting Richer But Americans Are Unhappier
Carol Graham
Huffington Post, October 18, 2018

"What kinds of jobs are available to people without much education? By and large, the answer is: jobs that do not pay enough to live on," Desmond writes.

Economists Care About Where They Publish— to the Cost of the Profession
James Heckman
The Economist, October 6, 2018

The Economist highlighted HCEO Co-Director James Heckman’s latest working paper, on publishing and promotion in economics. Heckman finds that getting published in the top five economics journals affects who gets tenure, even though such publications are imperfect measures of quality.

The Segregation of our Everyday Lives
Robert Sampson, Mario Small
CityLab, August 10, 2018

CityLab covered a recent project by MIP network members Robert Sampson and Mario Small, which tracked the ways people from different classes and races are segregated in U.S. cities. The authors find that "racial segregation is operating at a higher-order level than typically recognized: Racial segregation is manifest not only where people live but also where they travel throughout a city and whom they are exposed to."
NOTABLE MEMBER AWARDS
Accomplishments and Honors

HCEO Members were honored this year for their deep understanding of, and cutting edge research into the issue of inequality around the world.

Martha Nussbaum
The University of Chicago
Member, Inequality: Measurement, Interpretation, and Policy
October 30, 2018
Martha Nussbaum was named the winner of the 2018 Berggruen Prize for Philosophy & Culture, a $1 million award given annually to thinkers whose ideas have profoundly shaped human self-understanding and advancement in a rapidly changing world. Nussbaum is the Ernst Freund Distinguished Service Professor of Law and Ethics at the University of Chicago.

Terrie Moffitt
Duke University
Member, Identity and Personality
April 11, 2018
IP network member Terrie Moffitt was elected to the National Academy of Medicine. Moffitt was recognized for her “path-breaking contributions to our understanding of human development, including her seminal theory of the development of antisocial behavior, which has had wide-ranging influence on clinical diagnosis of childhood conduct disorders, the early-years intervention movement, and two Supreme Court decisions.” Moffitt is the Nannerl O. Keohane University Professor in the Department of Psychology and Neuroscience at Duke University.

Gene Robinson
University of Illinois
Member, Health Inequality
October 15, 2018
Gene Robinson, a new member of our HI network, was elected to the National Academy of Medicine “for pioneering contributions to understanding the roles of genes in social behavior.” Election to the NAM “is considered one of the highest honors in the fields of health and medicine and recognizes individuals who have demonstrated outstanding professional achievement and commitment to service.” Robinson holds the Swanlund Chair in Entomology and Center for Advanced Study professorships in Entomology and Neuroscience at the University of Illinois.

Meghan Azad
University of Manitoba
Member, Health Inequality
October 10, 2018
Meghan Azad, a member of HCEO’s HI network, was the recipient of the International Society for Research in Human Milk and Lactation 2018 Ehrlich-Koldovsky Award. The biennial award is given to early-career investigators who have begun to make “outstanding, original scientific contributions to the study of human milk and lactation.” Azad is an Assistant Professor of Pediatrics and Child Health at the University of Manitoba.

Martha Bailey
University of Michigan
Member, Inequality: Measurement, Interpretation, and Policy
October 4, 2018
Martha Bailey, an MIP network member, was elected to the Executive Committee of the American Economic Association. Bailey is a Professor of Economics and a Research Professor at the Population Studies Center at the University of Michigan.

Keri Leigh Merritt
Member, Inequality: Measurement, Interpretation, and Policy
September 17, 2018
Keri Leigh Merritt, an MIP network member, won the Southern Historical Association’s 2018 Bennett H. Wall Award for her book Masterless Men: Poor Whites and Slavery in the Antebellum South. The prize is awarded to “the best book published in southern business or economic history over a two-year period.” Merritt works as an independent scholar in Atlanta, Georgia.

Armin Falk
University of Bonn
Leader, Identity and Personality; Member, Early Childhood Interventions, Inequality: Measurement, Interpretation, and Policy
September 4, 2018
IP network leader Armin Falk received the 2018 Felix Büchel Award at the International SOEP User Conference. The prize sponsor wrote that Falk’s work aims at “improving the explanatory power of economic models and have provided the basis for empirically well-founded economic policy.” Falk is Professor in the Department of Economics at the University of Bonn and Chief Executive Officer of briq, the Institute on Behavior and Inequality.

Nezih Guner
Barcelona Graduate School of Economics
Leader, Family Inequality
December 2017
FI network leader Nezih Guner was elected President of the Spanish Economic Association for 2018. The SEA “aims at promoting the dissemination of scientific knowledge in Economics, by organizing congresses, promoting publications and, in general, through any other means leading to that goal.” Guner is a Professor at CEMFI, an ICREA Research Professor at MOVE, and a Research Professor, Barcelona Graduate School of Economics.
HCEO disseminates the work of its members through four media channels: hceconomics.org, YouTube, Facebook, and Twitter.

HCECONOMICS.ORG AS A GLOBAL RESOURCE

The new HCEO website went live on November 14, 2013. This site has been completely redesigned from top to bottom to be easier to update and maintain, but more importantly, to share the work of HCEO with a larger audience. Since launch, HCEO’s website had 534,836 pageviews and 180,807 users.

GLOBAL PARTNERSHIPS
Fostering International Collaboration

As part of our mission to address opportunity equality worldwide, HCEO partners with local and global organizations to help expand the engagement of scholars. Through these partnerships, HCEO has been able to broaden the reach of our programs, including our Summer School on Socioeconomic Inequality and the Asian Family in Transition initiative. We look forward to continuing to foster a spirit of collaboration with the international academic community.

HCEO continues to partner with local and global organizations to help expand the engagement of scholars. Through these partnerships, HCEO has been able to broaden the reach of our programs, including our Summer School on Socioeconomic Inequality Series. We look forward to continuing to foster a spirit of collaboration with the international academic community. HCEO continues to build institutional relationships that lead to interdisciplinary and international collaborations. In 2018, HCEO expanded our international collaborations by hosting two new training seminars in Guangzhou and Beijing. A Student Training Seminar was hosted at Peking University in Beijing, and designed to help students beginning their PhD with understanding how to form meaningful research questions that address underlying issues of inequality. A faculty training seminar was held at Jinan University in June, co-organized by the Institute for Economic and Social Research. The program was designed to foster collaboration between early career faculty and post-doctoral scholars, as well as gave participants an opportunity to receive training from senior scholars in their fields.

SUMMER SCHOOLS ON SOCIOECONOMIC INEQUALITY

In 2018 HCEO returned to Germany to host SSSI Bonn 2018 in partnership with the Behavior and Inequality Research Institute led by HCEO Network Leader Armin Falk at the University of Bonn. An SSSI program hosted in Chicago at the University of Chicago, was designed specifically for master’s level students and practitioners. Students and practitioners from around the world joined HCEO for a week of seminars focusing on topics ranging from disparities in children’s brain development, crime & inequality, dream hoarding, tax policy, and intergenerational mobility. In 2019 HCEO will host its first SSSI program in Bergen Norway with the FAIR organization, led by HCEO members Bertil Tungodden and Kjell Salvanes. We will also host our first ever program designed for undergraduates in July 2019 in partnership with IESR at Jinan University.
ABOUT HCEO

Our Vision

Founded in 2010, the Human Capital and Economic Opportunity Global Working Group (HCEO) is a collaboration of 528 researchers, educators, and policy makers focused on human capital development and its impact on opportunity inequality. HCEO’s unique approach enables collaboration among scholars with varying disciplines, approaches, perspectives, and fields. This means the integration of biological, sociological, and psychological perspectives into traditionally economic questions. The result is innovative thinking and approaches to inequality and human capital development research.

DIRECTORS

James J. Heckman is a Nobel Laureate and the Henry Schultz Distinguished Service Professor of Economics at the University of Chicago. He is also founder and director of the Center for the Economics of Human Development. He has devoted his professional life to understanding the origins of major social and economic problems related to inequality, social mobility, discrimination, skill formation and regulation, and to devising and evaluating alternative strategies for addressing those problems. His research recognizes the diversity among people in skills, family origins, peers, and preferences as well as the diversity of institutions and regulations and the consequences of this diversity for analyzing and addressing social and economic problems.

Steven N. Durlauf is the Steans Professor in Educational Policy at the Harris School of Public Policy at the University of Chicago. He is Associate Director of the Center for the Economics of Human Development, a Fellow of the Econometric Society, a Fellow of the American Academy of Arts and Sciences, and a Research Associate of the National Bureau of Economic Research. For two years, he served as Program Director for the Economics Program of the Santa Fe Institute.

Robert H. Dugger is the co-founder of ReadyNation, the Managing Partner of Hanover Provident Capital, a retired partner in the hedge fund Tudor Investment Corporation, and former board chairman of Grumeti Reserves Ltd., a Tanzanian wildlife conservation company whose tourism operations are managed by Singita and were ranked by Travel + Leisure magazine as the best in the world in 2011 and 2012.

WHAT WE DO

The organization comprises six research networks that focus on the most pressing issues within human capital development and inequality. These networks produce one-of-a-kind conferences, research programs, publications, and education that highlight findings from the best science and the application of best practices. Through its networks and innovative research, HCEO plays a vital role in understanding and addressing opportunity inequality around the world.
A UNIQUE APPROACH

- Welcomes all researchers regardless of approach, school of thought, or discipline
- Networks are self-managed and self-governed vs. driven by a single organizational agenda
- Supports and generates research without expectation of predetermined outcomes
- Extends network membership well beyond economics to biological, sociological, and psychological perspectives
- Encourages debate, discussion, and exchanges that result in better research outcomes

WE PLAY A VITAL ROLE

- Income and opportunity inequality is a global and growing problem
- Governments, private think tanks, and others each look at only a portion of the total problem in hopes of finding a lasting solution
- Only HCEO integrates biological, sociological, and psychological perspectives into traditionally economic questions addressed by multidisciplinary teams of experts
- Our approach treats social science research as an empirical endeavor, resulting in rigorously tested public policy directions and solutions
- Our members’ research provides insights and directions on how to best foster human flourishing and improve economic productivity

IMPACT

- Multidisciplinary networks result in new approaches to research and its application
- Relationships with governments and policy makers put best practices into action
- Influences numerous research studies and governmental policies
- Findings are being directly applied in one of the largest populations in the world—China

STAFF

Alison Baulos is the Executive Director of the Center for the Economics of Human Development and oversees all academic initiatives including the Human Capital and Economic Opportunity Global Working Group. She received a B.A. in Psychology and an A.M. in Social Service Administration from the University of Chicago, and an MBA from the University of Chicago’s Booth School of Business.

Valorie Nash is the Associate Director for the Human Capital and Economic Opportunity Global Working Group. As Associate Director, Valorie builds collaborative relationships between HCEO and institutional partners in the US and abroad. She works closely with HCEO’s directors to set and execute strategic goals and initiatives, as well as identify new partnerships. Valorie implements new and existing programs, including the innovation and development of conferences and summer schools for HCEO’s six networks. Valorie received a B.A in International Business from Azusa Pacific University and an A.M. in Business Management from Harvard University.

Kerry Cardoza is the Communications Coordinator for the Human Capital and Economic Opportunity Global Working Group. She manages the group’s social media channels and disseminates members’ research. Prior to joining HCEO, she wrote for the Chicago Reader, Newcity and the Sun Times Network. She also spent four years as an advocate and Case Manager for domestic violence survivors. Cardoza has an M.S. in Journalism from Northwestern University and a B.A. in English and Women’s Studies from Northeastern University.

Octavian Busuioc is the Multimedia and Graphic Design Director for the Human Capital and Economic Opportunity Global Working Group. He leads the visual identity of the project including maintenance of print materials. He also manages technology for the group. He received a B.A. from the University of Toronto in 2006 and an M.A. and Ph.D. in Philosophy from Queen’s University in 2007 and 2013 respectively.

Jennifer Pachon is the Program Manager for Academic Initiatives and Publications for the Human Capital and Economic Opportunity Global Working Group. She led the creation and launch of the original website and the redesigned website and launched and now maintains HCEO’s website and the creation and innovation of print materials. She also manages technology for the group. She received a B.A. from the University of Chicago and an M.A. in Philosophy from Swarthmore College and an M.A. in Philosophy from the University of Chicago, working on the philosophy of science and philosophy of mind.
Identity and Personality
The Identity and Personality Network studies the reciprocal relationship between individual differences and economic, social, and health outcomes.

Network Leaders: Angela Duckworth | Armin Falk | Joseph Kable | Tim Kautz | Rachel Kranton

Markets
The Markets Network investigates human capital financing over the lifecycle.

Network Leaders: Dean Corbae | Lance Lochner | Mariacristina De Nardi

Inequality: Measurement, Interpretation, & Policy
The Inequality: Measurement, Interpretation, and Policy Network studies policies designed to reduce inequality and boost individual flourishing.

Network Leaders: Robert H. Dugger | Steven N. Durlauf | Scott Duke Kominers | Richard V. Reeves

Health Inequality
The Health Inequality Network unifies several disciplines into a comprehensive framework for understanding health disparities over the lifecycle.

Network Leaders: Christopher Kuzawa | Burton Singer

Early Childhood Interventions
The Early Childhood Interventions Network investigates the early origins of inequality and its lifetime consequences.

Network Leaders: Pia Britto | Flavio Cunha | James J. Heckman | Petra Todd

Family Inequality
The Family Inequality Network focuses on the interactions among family members to understand the well-being of children and their parents.

Network Leaders: Pierre-André Chiappori | Flavio Cunha | Nezih Guner

LEADERSHIP AND NETWORKS
Connecting Experts Across Fields
HCEO’s Interdisciplinary Composition

HCEO currently consists of 528 members from institutions in 30 countries. We connect experts across disciplines to advance innovative thinking and approaches to inequality and human capital development research, which are designed to improve individual opportunity worldwide.

HCEO’s International Reach

HCEO members work in 30 different countries across the globe. The diversity of perspectives offered by an international membership helps to reinforce HCEO’s mission to integrate not only disparate academic approaches to the problems of inequality and development, and also the distinct facets of those problems displayed in different countries.

HCEO’s Interdisciplinary Composition

Although the majority of our members are economists, we also have members from psychology, health sciences, anthropology, and philosophy among our number. Membership in HCEO is by invitation from the network leaders who select researchers, educators, and policymakers dedicated to the scientific principles of HCEO and who embrace the opportunities HCEO provides to bridge boundaries between disciplines.
