HCEO is run by the Center for the Economics of Human Development, and funded by the Institute for New Economic Thinking.
In 2020, a year like no other, the Human Capital and Economic Opportunity Global Working Group re-envisioned the ways in which we engage with our members and our audience. We launched our first-ever virtual Summer School on Socioeconomic Inequality and held our first-ever virtual conference.

We continued our commitment to training the next generation of scholars by awarding three dissertation prizes, the winners will present their work virtually in the coming months.

In addition to our programming, HCEO remains dedicated to disseminating members’ academic findings to a broader audience. In 2020, we added more than 80 working papers to our series, which have been viewed more than 14,000 times this year. We also added nine 3 Questions interviews to our website and six Research Spotlights. In the year to come, HCEO is dedicated to fostering the spirit of new economic thinking through our ongoing work, and we look forward to continued growth.

James J. Heckman  Steven N. Durlauf  Robert H. Dugger
Research is developing rapidly during the COVID–19 pandemic, a time when the public needs access to factual information. Many HCEO members are at the forefront of coronavirus–related research, examining areas ranging from unemployment numbers to the healthcare system to housing policy. Below you can find a sample of the range of research projects and writing from our members on the topic, all of which are aggregated on the COVID–19 research page on the HCEO website. We are updating the page with new research as it becomes available.

**FEATURED PROJECTS**

**Child Care is Key to Our Economic Recovery**
This report, authored by MIP network member Aaron Sojourner, the National Women’s Law Center, and the Center for Law and Social Policy, finds that at least $9.6 billion is needed each month to fully fund existing providers in the child care system during the coronavirus pandemic. The authors write that without public financial support, “a devastated child care system will become an obstacle to recovery.”

**COVID Inequality Project**
In this ongoing project, ECI network member Teodora Boneva and colleagues are investigating the impact of the COVID–19 crisis on labor market outcomes. The project is particularly concerned with how the pandemic and government policies are impacting inequality across many dimensions relating to workers, including age, gender, occupation, work arrangements, and education.

HCEO achieves its mission through workshops, conferences, webinars, cross–institutional visits, partnerships, and annual summer schools. Since its inception in January 2011, HCEO has held 109 events in 13 countries. HCEO events have attracted over 3,320 participants. Here we highlight upcoming and recent events. More details, including videos and related materials, can be found on our website at hceconomics.org.

**UPCOMING EVENTS**
March 2, 2021  Dissertation Prize Presentation
Laia Navarro-Sola, an Assistant Professor at the Institute for International Economic Studies at Stockholm University, will present “Essays in Human Capital in Developing Countries.” Her dissertation analyzes the labor market returns of providing secondary education through schools that use televised lessons in Mexico, finding that an additional year of education increases average income by 17.6%.

**FEATURED RECENT EVENTS**
December 11–12, 2020  Conference on New Approaches to Intergenerational Mobility
Research on intergenerational mobility has advanced rapidly in recent years and has captured much attention of policy makers and thought leaders. At the same time the explosion of empirical work on mobility remains relatively unconnected from the methodological frontiers in econometrics and economic theory. Organized by HCEO Director Steven Durlauf and MIP network member Esfandiar Maasoumi, this conference brought together researchers who emphasize these foundational aspects and help to provide a deeper analysis of the empirical findings.

**UPCOMING EVENTS**
March 2, 2021  Dissertation Prize Presentation
Laia Navarro-Sola, an Assistant Professor at the Institute for International Economic Studies at Stockholm University, will present “Essays in Human Capital in Developing Countries.” Her dissertation analyzes the labor market returns of providing secondary education through schools that use televised lessons in Mexico, finding that an additional year of education increases average income by 17.6%.

### HCEO Dissertation Prize Lunch Lecture: Moved to Opportunity
Oct 19, 2017
bit.ly/3A8dko2
It was a boost of creativity. A push of going further and deeper. And overall I evaluate it as the best summer school I attended during my Ph.D.

Coming from a non-US based university, the SSSI was a great opportunity for me to meet and discuss with researchers who are at the frontiers of our field.

**STUDENT AND FACULTY TRAINING SEMINARS**

In 2019, HCEO partnered with Jinan University for our first-ever Summer School for Undergraduate Students, which offered introductory lectures from international scholars on various economic topics. Students also had the opportunity to present their work before a panel of leading experts and receive constructive feedback. HCEO looks forward to continuing this program with Jinan University in 2021.

We also plan to offer our first-ever training program for junior faculty in Africa in the summer of 2021. Though still in an early planning stage, the weeklong virtual program, launched by HCEO Director Steven Durlauf and MIP network member Larry Blume in collaboration with the Africa Standing Committee of the Econometric Society, will offer lectures from leading economists around the world and will also allow participants the chance to present their own research and receive feedback from faculty.

**FEEDBACK FROM SSSI ALUMNI**

“SSSI was an eye opening experience that had large impacts on my research and career. It was a great opportunity to interact with leaders in the field and get exposure to cutting edge and relevant skills for doing research. Getting to know other serious students who were successful later on in their subsequent careers was also invaluable. I learned a lot about how to think critically, present work, and interact with other researchers in that short week.”

“It was an inspiring and confidence-boosting week to meet fellow students and present research. One of the best experience of the Ph.D. and I am encouraging everyone to apply as it’s certainly a worthwhile experience for a budding academic.”

“SSSI provided a great opportunity to learn new techniques and acquire different perspectives on old methods. The close interaction with faculty and students was very valuable and has had considerable impact on my subsequent research.”

HCEO is committed to honoring INET’s mission to build a home for a new generation of thinkers. All HCEO programming engages interdisciplinary groups of graduate students and our Emerging Scholars program provides opportunities for junior researchers to present their work to our senior members.

**ABOUT SSSI**

The Human Capital and Economic Opportunity Global Working Group Summer Schools on Socioeconomic Inequality provide a state-of-the-art overview on the study of inequality and human flourishing. Participants learn about the integration between psychological and sociological insights into the foundations of human behavior and conventional economic models. Through rigorous lectures students are trained on various tools needed to study the issue of inequality.

**PREVIOUS SUMMER SCHOOLS**

Summer Schools in 6 Countries
In 2017, we launched a competition for the best doctoral dissertation on a topic related to one of HCEO’s six networks. In 2020, HCEO awarded its fourth annual dissertation prize to Winnie van Dijk, Roni Pener-Tessler, and Laia Navarro-Sola. The winners were each awarded a $1,000 prize and the opportunity to present their work to the public virtually, as part of the Center for the Economics of Human Development’s Lifecycle Working Group.

Van Dijk’s dissertation, “Essays on Rental Housing Market Policies and the Socio-Economic Mobility of Low-Income Households,” analyzes the effect of Europe’s largest public housing program on socio-economic outcomes and studies the consequences of eviction in Cook County, Illinois. Van Dijk presented a chapter of her dissertation in a public Zoom lecture in December.

In “Essays in Human Capital in Developing Countries,” Navarro-Sola studies the educational and labor market impacts of telesecundarias, Mexican secondary schools that use televisions to deliver instruction, and examines the multidimensionality of school output and parental preferences in Trinidad and Tobago. She will present her paper as part of the Lifecycle Working Group in March.

Pener-Tessler’s paper, “The Development of Self-control in Children: Genetic and Parental Influences and the Interplay of Parenting and Genetics,” provides one of the first longitudinal investigations of gene–parenting interplay in self-control, studying the role of children’s genes in the parenting they receive, through the child’s self-control. She will present her paper virtually in the spring quarter.

The coronavirus outbreak has caused significant disruptions to people’s lives. We document the impact of stay-at-home orders on mental health using real-time survey data in the US. The lockdown measures lowered mental health by 0.085 standard deviations. This large negative effect is entirely driven by women. As a result of the lockdown measures, the existing gender gap in mental health has increased by 66%. The negative effect on women’s mental health cannot be explained by an increase in financial worries or childcare responsibilities.

2020-041: Effect of Universal TB Vaccination and Other Policy-Relevant Factors on the Probability of Patient Death from COVID-19
Amos Golan, Tinatin Mumladze, Danielle Wilson, Elissa Cohen, Troy McGuinness, William Mooney, and Jisung Moon

The possibility of recurring waves of the novel coronavirus that triggered the 2020 pandemic makes it critical to identify underlying policy-relevant factors that could be leveraged to decrease future COVID-19 death rates. We examined variation in a number of underlying, policy-relevant, country-level factors and COVID-19 death rates across countries. We found three such factors that significantly impact the survival probability of patients infected with COVID-19. In order of impact, these are universal TB (BCG) vaccination, air pollution deaths, and a health-related expenditure. We quantify each probability change by age and sex. To deal with small sample size and high correlations, we use an information-theoretic inferential method that also allows us to introduce priors constructed from independent SARS data.

2020-061: Consumption and Income Inequality across Generations
Giovanni Gallipoli, Hamish Low, and Aruni Mitra

We characterize the joint evolution of cross-sectional inequality in earnings, other sources of income and consumption across generations in the U.S. To account for cross-sectional dispersion, we estimate a model of intergenerational persistence and separately identify the influences of parental factors and of idiosyncratic life-cycle components. We find evidence of family persistence in earnings, consumption and saving behaviours, and marital sorting patterns. However, the quantitative contribution of idiosyncratic heterogeneity to cross-sectional inequality is significantly larger than parental effects. Our estimates imply that intergenerational persistence is not high enough to induce further large increases in inequality over time and across generations.
NEW RESOURCES
Expanding HCEO’s Reach

HCEO has launched several exciting initiatives aimed at sharing the important research of our 555 members with a wider audience. Our 3 Questions series, Research Spotlight, and member video interviews all work towards HCEO’s mission of understanding and addressing opportunity inequality around the world.

RESEARCH SPOTLIGHTS

Bimonthly on our website, we publish a new Research Spotlight, which is a longform article that highlights the work from a recent HCEO working paper. Our Research Spotlights help make the work of our members accessible to a wider audience. This past year, we have featured papers on topics including: how deep learning can improve credit scoring models, the impact of mentoring on inequality of opportunity, and building inter-ethnic cohesion in schools. In 2020, our Research Spotlights have been accessed through our website more than 1,500 times.

Read Recent Spotlights:

- Sonia Oreffice & Climent Quintana-Domeque: bit.ly/37wrN3T
- Teodora Boneva: bit.ly/33J86EO
- Armin Falk, Pia Pinger, & Fabian Kosse: bit.ly/2Jxrqhz

3 QUESTIONS

Our 3 Questions series consists of brief interviews with HCEO members across all six networks. Published monthly on our website, the interviews spotlight our members and the important research they are doing across disciplines.

Read Recent 3 Questions:

- Ariel Kalil: bit.ly/37wNUY2
- Áureo de Paula: bit.ly/3mDfetZ
- Anthony Laden: bit.ly/2KXj432

VIDEO INTERVIEWS

Launched in 2016, our HCEO member video interview series continues to be a popular resource. The member interviews are published on the HCEO website as well as on our YouTube channel, where they have garnered more than 40,000 views. In 2018, we also launched a new video series where affiliated members discuss how they became interested in their field of study.

- Kimberly Noble: bit.ly/3ooJXv4
Why Did Hundreds of Thousands of Women Drop Out of the Work Force?
Stefania Albanesi
New York Times, October 3, 2020
FI network member Stefania Albanesi spoke to the New York Times about the increasing number of women leaving the labor force during the pandemic. “The earnings gap issue is a big part of the story at this point,” she said. “The bigger the wage gap across spouses, the smaller the labor supply of the secondary earner, which is typically the wife.”

The Tenants Who Evicted Their Landlord
Matthew Desmond
The New York Times Magazine, October 13, 2020
MIP network member Matthew Desmond spent months following a group on Minneapolis tenants who organized and bought their buildings from their landlord. He writes, “I saw the tenants reimagine — and then reinvent — affordable housing could look like in their community.”

How the Pandemic Is Worsening America’s Racial Gaps
Damon Jones
Politico, October 16, 2020
MIP network member Damon Jones discusses what he calls the “feedback loop” caused by the pandemic, where racial inequities predating the pandemic are exacerbated by it. “We don’t want to ‘stimulate’ the economy; the word ‘relief’ is more accurate, because we need to give people relief until it is safe to open the economy back up,” he says.

What’s the return on investment for early childhood development? Big, says a Nobel Prize-winning economist
James Heckman
Milwaukee Journal Sentinel, November 27, 2020
This article highlights HCEO Director James Heckman’s extensive research on early childhood education, including recent work on home-visiting programs. “There is no more effective investment than investing in early childhood education,” he says.
NOTABLE MEMBER AWARDS
Accomplishments and Honors

HCEO Members were honored this year for their deep understanding of, and cutting edge research into, the issue of inequality around the world.

Magne Mogstad
The University of Chicago
Member, Early Childhood Interventions
June 2020

The Society of Labor Economists awarded the 2020 Sherwin Rosen Prize to ECI network member Magne Mogstad for his outstanding achievement in the field of labor economics. The prize is given to those labor economists who make the greatest contributions to the discipline within 12 years of receiving their Ph.D.

Richard Blundell
University College London
Member, Family Inequality
June 2020

FI network member Richard Blundell received the 2020 Jacob Mincer Award for his lifetime contributions to the field of labor economics. The board writes that Blundell’s “long series of important contributions to the theory and practice of applied economics” make him “an outstanding and truly worthy recipient.”

Kate Ho
Princeton University
Member, Inequality: Measurement, Interpretation, and Policy
August 2020

MIP network member Kate Ho was awarded the 2020 Frisch Medal of the Econometric Society. The committee wrote that in the paper, Ho and co-author Robin Lee “tackle important questions of countervailing power in regulated markets.”

Teodora Boneva
University of Zurich
Member, Early Childhood Interventions
September 2020

ECI network member Teodora Boneva received a European Research Council Starting Grant for her project on the role of beliefs, constraints, and social norms in women’s decisions about having children and returning to work after childbirth. Every year, the ERC “selects and funds the very best, creative researchers of any nationality and age to run projects based in Europe.”

Dirk Krueger
University of Pennsylvania
Member, Markets
September 2020

Dirk Krueger, a Markets network member, was elected to the Fellows of the Econometric Society, which is dedicated to the advancement of economic theory in its relation to statistics and mathematics.

David Autor
Massachusetts Institute of Technology
Member, Inequality: Measurement, Interpretation, and Policy
October 2020

MIP network member David Autor was named the recipient of the Heinz 25th Special Recognition Award. The award is for Autor’s research on labor, trade, and economic security, “and for transforming our understanding of how globalization and technological change are impacting jobs and earning prospects for American workers.”

Stefanie Stantcheva
Harvard University
Member, Markets
October 2020

Stefanie Stantcheva received the Elaine Bennett Research Prize from the American Economic Association’s Committee on the Status of Women in the Economics Profession for her remarkable contributions to “our understanding of optimal taxation, the relationship between innovation and taxation, and social preferences about redistribution.” The prize is awarded every other year “to recognize, support, and encourage outstanding contributions by young women in the economics profession.”

Sally Grantham-McGregor
University College London
Member, Early Childhood Interventions
October 2020

Sally Grantham-McGregor, an ECI network member, received an Officer of the Most Excellent Order of the British Empire (OBE) honor in the Queen’s Birthday Honors, for her services to early childhood development in developing countries. The honor is awarded to those making a great impact in their line of work.

Damon Jones
The University of Chicago
Member, Inequality: Measurement, Interpretation, and Policy
November 2020

MIP network member Damon Jones was named to the Council of Economic Advisers for the Biden-Harris transition. The Agency Review Teams are composed of highly experienced and talented professionals that “reflect the diversity of perspectives crucial for addressing America’s most urgent and complex challenges.”
HCEO disseminates the work of its members through four media channels: hceconomics.org, YouTube, Facebook, and Twitter.

HCEO RESEARCH ON SOCIAL MEDIA

In addition to the website, HCEO maintains active YouTube, Twitter, and Facebook feeds and uses them to disseminate the work of HCEO members. HCEO’s YouTube views, Facebook likes, and Twitter followers continue to grow.

GLOBAL PARTNERSHIPS
Fostering International Collaboration

As part of our mission to address opportunity equality worldwide, HCEO partners with local and global organizations to help expand the engagement of scholars. Through these partnerships, HCEO has been able to broaden the reach of our programs, including our Summer School on Socioeconomic Inequality and the Asian Family in Transition initiative. We look forward to continuing to foster a spirit of collaboration with the international academic community.

SUMMER SCHOOLS ON SOCIOECONOMIC INEQUALITY

In 2020, HCEO planned to continue our partnership with the briq Institute on Behavior & Inequality with our third SSSI program at their campus in Bonn, Germany. Due to the coronavirus pandemic, our 2020 in-person summer programming was canceled, and we have rescheduled this SSSI for 2022. This partnership has resulted in additional international collaborations, including the election of HCEO Director James Heckman to briq’s Scientific Council. Similarly, our ongoing partnership with Jinan University and the Institute for Economic and Social Research, which began with our first joint SSSI program in 2016, has also developed into a robust collaborative academic relationship. We have since hosted several summer schools, conferences, and training programs at Jinan University, including our 2016 Asian Family in Transition Conference on Migration and our 2018 Faculty Collaborative Seminar. And in 2018, HCEO’s parent organization, the Center for the Economics of Human Development, launched the UChicago-Jinan Initiative. The initiative focuses specifically on the context of China and facilitates academic exchange between the two universities.

ASIAN FAMILY IN TRANSITION

The Asian Family in Transition (AFIT) initiative, formally launched in March 2015, continues its pursuit of studying the economics of demographic changes in China, Japan, Korea, and Southeast Asia. Led by HCEO Director James Heckman, in collaboration with ECI network member Junsen Zhang of the Chinese University of Hong Kong, the initiative has hosted Dr. Jin Zhou, AFIT’s inaugural postdoctoral scholar, since 2016. An applied microeconomist, Dr. Zhou’s research focuses on migration behavior in China and on understanding educational impact on individuals labor market outcomes. Dr. Zhou has recently presented her work at the June 2019 China Econometric Society Meeting, the June 2019 Conference on Home Visiting in Comparative Perspective, in Beijing, China, the September 2019 Conference on the Economics of Child Development in Chicago, the November 2019 Conference on the Scale-up Effect in Early Childhood and Public Policy in Chicago, and at the January 2020 American Economic Association Annual Meeting in San Diego, CA.
Founded in 2010, the Human Capital and Economic Opportunity Global Working Group (HCEO) is a collaboration of 555 researchers, educators, and policy makers focused on human capital development and its impact on opportunity inequality. HCEO’s unique approach enables collaboration among scholars with varying disciplines, approaches, perspectives, and fields. This means the integration of biological, sociological, and psychological perspectives into traditionally economic questions. The result is innovative thinking and approaches to inequality and human capital development research.

**DIRECTORS**

**James J. Heckman** is a Nobel Laureate and the Henry Schultz Distinguished Service Professor of Economics at the University of Chicago. He is also founder and director of the Center for the Economics of Human Development. He has devoted his professional life to understanding the origins of major social and economic problems related to inequality, social mobility, discrimination, skill formation and regulation, and to devising and evaluating alternative strategies for addressing those problems. His research recognizes the diversity among people in skills, family origins, peers, and preferences as well as the diversity of institutions and regulations and the consequences of this diversity for analyzing and addressing social and economic problems.

**Steven N. Durlauf** is the Steans Professor in Educational Policy at the Harris School of Public Policy at the University of Chicago. He is Associate Director of the Center for the Economics of Human Development, a Fellow of the Econometric Society, a Fellow of the American Academy of Arts and Sciences, and a Research Associate of the National Bureau of Economic Research. For two years, he served as Program Director for the Economics Program of the Santa Fe Institute.

**Robert H. Dugger** is the co-founder of ReadyNation, the Managing Partner of Hanover Provident Capital, a retired partner in the hedge fund Tudor Investment Corporation, and former board chairman of Grumeti Reserves Ltd., a Tanzanian wildlife conservation company whose tourism operations are managed by Singita and were ranked by Travel + Leisure magazine as the best in the world in 2011 and 2012.

**WHAT WE DO**

The organization comprises six research networks that focus on the most pressing issues within human capital development and inequality. These networks produce one-of-a-kind conferences, research programs, publications, online resources, and education that highlight findings from the best science and the application of best practices. Through its networks and innovative research, HCEO plays a vital role in understanding and addressing opportunity inequality around the world.
Jennifer Pachon is the Academic Initiatives and Publications Manager for the Human Capital and Economic Opportunity Global Working Group. She led the creation and innovation of print materials. She also manages technology for the group. She received a B.A. from the University of Toronto in 2006 and an M.A. and Ph.D. in Philosophy from Queen’s University in 2007 and 2013 respectively.

Octavian Busuioc is the Multimedia and Graphic Design Director for the Human Capital and Economic Opportunity Global Working Group. He leads the visual identity of the project including maintenance of HCEO’s website and the creation and innovation of print materials. He also manages technology for the group. He received a B.A. from the University of Toronto in 2006 and an M.A. and Ph.D. in Philosophy from Queen’s University in 2007 and 2013 respectively.

Kerry Cardoza is the Communications and Outreach Manager for the Human Capital and Economic Opportunity Global Working Group. She manages the group’s social media channels, disseminates members research, and handles logistics for all programming. Cardoza has an M.S. in Journalism from Northwestern University and a B.A. in English and Women’s Studies from Northeastern University.

A UNIQUE APPROACH
- Welcomes all researchers regardless of approach, school of thought, or discipline
- Networks are self-managed and self-governed vs. driven by a single organizational agenda
- Supports and generates research without expectation of predetermined outcomes
- Extends network membership well beyond economics to biological, sociological, and psychological perspectives
- Encourages debate, discussion, and exchanges that result in better research outcomes

IMPACT
- Multidisciplinary networks result in new approaches to research and its application
- Relationships with governments and policy makers put best practices into action
- Influences numerous research studies and governmental policies
- Findings are being directly applied in one of the largest populations in the world—China
- Income and opportunity inequality is a global and growing problem
- Governments, private think tanks, and others each look at only a portion of the total problem in hopes of finding a lasting solution
- Only HCEO integrates biological, sociological, and psychological perspectives into traditionally economic questions addressed by multidisciplinary teams of experts
- Our approach treats social science research as an empirical endeavor, resulting in rigorously tested public policy directions and solutions
- Our members’ research provides insights and directions on how to best foster human flourishing and improve economic productivity
- Multidisciplinary networks result in new approaches to research and its application
- Relationships with governments and policy makers put best practices into action
- Influences numerous research studies and governmental policies
- Findings are being directly applied in one of the largest populations in the world—China

STAFF

Alison Baulos is the Executive Director of the Center for the Economics of Human Development and oversees all academic initiatives including the Human Capital and Economic Opportunity Global Working Group. She received a B.A. in Psychology and an A.M. in Social Service Administration from the University of Chicago, and an MBA from the University of Chicago’s Booth School of Business.

WE PLAY A VITAL ROLE

Jennifer Pachon is the Academic Initiatives and Publications Manager for the Human Capital and Economic Opportunity Global Working Group. She led the creation and launch of the original website and the redesign of the HCEO’s working paper series. In addition, she oversees the newsletter and research efforts of the working group. She received a B.A. in Philosophy from Swarthmore College and an M.A. in Philosophy from the University of Chicago, working on the philosophy of science and philosophy of mind.
LEADERSHIP AND NETWORKS
Connecting Experts Across Fields

Early Childhood Interventions
The Early Childhood Interventions Network investigates the early origins of inequality and its lifetime consequences.

Network Leaders: Pia Britto | Flavio Cunha | James J. Heckman | Petra Todd

Family Inequality
The Family Inequality Network focuses on the interactions among family members to understand the well-being of children and their parents.

Network Leaders: Pierre-André Chiappori | Flavio Cunha | Nezih Guner

Health Inequality
The Health Inequality Network unifies several disciplines into a comprehensive framework for understanding health disparities over the lifecycle.

Network Leaders: Christopher Kuzawa | Burton Singer

Identity and Personality
The Identity and Personality Network studies the reciprocal relationship between individual differences and economic, social, and health outcomes.

Network Leaders: Angela Duckworth | Armin Falk | Joseph Kable | Tim Kautz | Rachel Kranton

Inequality: Measurement, Interpretation, & Policy
The Inequality: Measurement, Interpretation, and Policy Network studies policies designed to reduce inequality and boost individual flourishing.

Network Leaders: Robert H. Dugger | Steven N. Durlauf | Scott Duke Kominers | Richard V. Reeves

Markets
The Markets Network investigates human capital financing over the lifecycle.

Network Leaders: Dean Corbae | Lance Lochner | Mariacristina De Nardi
HCEO’s Interdisciplinary Composition

HCEO currently consists of 555 members from institutions in 30 countries. We connect experts across disciplines to advance innovative thinking and approaches to inequality and human capital development research, which are designed to improve individual opportunity worldwide.

HCEO’s International Reach

HCEO members work in 30 different countries across the globe. The diversity of perspectives offered by an international membership helps to reinforce HCEO’s mission to integrate not only disparate academic approaches to the problems of inequality and development, and also the distinct facets of those problems displayed in different countries.

HCEO’s Interdisciplinary Composition

Although the majority of our members are economists, we also have members from psychology, health sciences, anthropology, and philosophy among our number. Membership in HCEO is by invitation from the network leaders who select researchers, educators, and policymakers dedicated to the scientific principles of HCEO and who embrace the opportunities HCEO provides to bridge boundaries between disciplines.
